

CLEARANCE SALE - All Water Features Now 50% off

GRANITE WATER FEATURES

Freestanding features

Hexagon

100 x 35 x 35cm

Weight: 118Kg

Was
£295
NOW
£148

A simple but very effective water feature with a rippling water flow down all sides.

Stratos

120 x 40 x 40cm

Weight: 136Kg

Was
£295
NOW
£148

The ridging of the stone is vertical rather than horizontal in this feature, so the water flow is smooth, calming and quiet.

Linea

120 x 30 x 30cm

Weight: 144Kg

Was
£295
NOW
£148

Water flows only over the ridged sections of Linea, leaving the polished sections dry.

Hexagon Polished

100 x 35 x 35cm

Feature only
Weight: 118Kg

Was
£295
NOW
£148

Water flows down the 3 ridged sides of this feature, leaving the 3 polished sides dry.

Installation Kit

Reservoir 100 dia. x 30cm

Was
£99
NOW
£49

There are three basic elements needed to set up a water feature: a reservoir to contain the water and on which the feature stands, a pump, and a length of hose.

The reservoir is usually buried so that the top is just level with the ground. The pump sits in the water inside the reservoir, with a hose attached which carries the water up the fountain. If it is not possible to bury the reservoir, it can also stand above ground and be disguised with a surround of some sort.

The kit includes:

- A heavy duty plastic reservoir, diameter 100cm, which is large enough to catch all the water splash, and has a removable section for easy access to the pump.
- A quality pump, which comes with 10m of cable*
- Hose, cable ties, mastic, etc (we supply the feature with the hose already secured inside)
- An anti-algae water treatment product for regular use.

*The pump can be connected to an outside socket, which must be professionally installed and have a circuit breaker.

If you connect to an indoor power point, a plug - in RCD adaptor must be used (available from DIY stores at about £10).

Self Contained Features

These self contained water features come with a matching granite water trough and can be situated inside or outdoors. We supply with them everything you need to get the feature up and running, including a pump with 10m of cable which is neatly led out of the trough through a hole in the side.

Hexagon Polished

100 x 60 x 60cm

Was
£375
NOW
£187.50

Weight: 146Kg inc trough

Water flows down the 3 ridged sides of this feature, leaving the 3 polished sides dry.

Hexagon Slate and Granite

100 x 60 x 60cm

Was
£375
NOW
£187.50
