Buxus Ball Topiary

Buxus Sempervirens Common name: Box

Buxus Sempervirens is a very popular choice for planting in pots, being an attractive low maintenance plant which can be clipped into different topiary shapes. It has small, densely packed glossy green leaves, which can be trimmed in the growing season (Summer) to retain the spherical shape.

- Evergreen
- Frost hardy
- Suitable for shade or sun
- Plant size varies within the dimensions given

Buxus Ball, Large
£49.95

Ligustrum 'Lollipop' Topiary

Ligustrum Delavayanum Common name: Privet

The classic lollipop topiary shape always looks wonderfully elegant in pots, and is often seen flanking smart doorways. Ligustrum is quite a slow growing evergreen plant, and will need just a light trim during the growing season (Summer) to keep it in shape. Decorative stones are good to use with the lollipop, as a large area of compost is exposed. Alternatively, you can plant low-growing or trailing plants around the stem, such as ivy.

- Evergreen
- Frost hardy
- Suitable for shade or sun
- Plant size varies within the dimensions given, both in stem height and diameter of ball

Ligustrum 'Lollipop'

£54.95

Stem 60-70cm Ball Dia. 30-35cm

Yellow Phormium

Phormium 'Yellow Wave' Common name: New Zealand Flax

Phormiums are eyecatching exotic plants with a mass of strappy sword shaped leaves. Our 'Yellow Wave' phormiums have a soft arching shape, and bright lime green leaves with creamy yellow stripes. They need minimal attention: just remove any dead or damaged leaves in late Spring. The larger size is not much taller than the small, but is fuller and more mature.

- Evergreen
- Frost hardy
- Suitable for sun or partial shade
- Plant size varies within the dimensions given

Phormium Yellow Wave, small
£9.95
H40cm approx.

Phormium Yellow Wave, large
£24.95
H50cm approx.

Black Phormium

Phormium 'Platt's Black' Common name: New Zealand Flax

Phormiums are eyecatching exotic plants with a mass of strappy sword shaped leaves. Our 'Platt's Black' phormiums have narrow fairly upright leaves in a dark purple-brown shade. They need minimal attention: just remove any dead or damaged leaves in late Spring. The larger size is not much taller than the small, but is fuller and more mature.

- Evergreen
- Frost hardy
- Suitable for sun or partial shade
- Plant size varies within the dimensions given

Phormium Platt's Black , small
£9.95
H45cm approx.

Phormium Platt's Black , large
£24.95
H50cm approx.

Self-Watering Reservoir

If you find daily watering a chore, this is a must. Using a water reservoir is a great way to make sure your plants have the right amount of water to thrive – even when you go away on holiday!

The reservoir is placed in the pot before the plant goes in, and is filled with water through the tube. Water is taken up into the compost and the roots by capillary action. The reservoir will hold enough water to keep your plants happy for at least 3 weeks, and you can tell when it needs refilling by an indicator float in the tube.

Using a reservoir also prevents water staining on hard landscaping and excess water runoff, and it is ideal for use in planters indoors.

For full details and instructions see the [Guide to Self-Watering Reservoir](#)
